UR5627

Polyurethane Resin

DESCRIPTION

UR5627 is a low viscosity, fast curing polyurethane encapsulation resin specifically designed for the protection of delicate components.

READ ENTIRE TECHNICAL BULLETIN BEFORE USING THIS PRODUCT

FEATURES AND BENEFITS

- Flexible at temperature extremes; exhibits good adhesion to a wide variety of substrates
- Excellent electrical properties
- Excellent resistance to acids and alkalis
- Flame retardant meeting UL94 V-2 requirements

APPROVALS

Standard	Status
RoHS Compliant (2015/863/EU)	Yes
UL Approval	No

PHYSICAL PROPERTIES

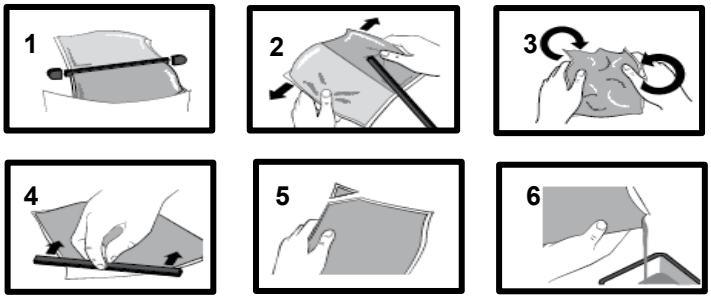
Category	Results
Liquid Properties	
Base Material	Polyurethane
Color Part A – Resin Part B - Hardener	 Clear Amber
Density Part A - Resin (g/mL) Part B - Hardener (g/mL)	 1.01 1.25
Viscosity (mPa s 23 °C) Part A Part B Mixed System	 1000 200 400
Mix Ratio Weight Volume	 1.39:1 1.72:1
Usable Life @ 20 °C	~ 20 minutes
Gel Time @ 23 °C	~ 30 minutes
Cure Time 23 °C 60 °C	 24 hours 1 hour
Storage Conditions	Dry Conditions: Above 20 °C, Below 30 °C
Shelf Life	12 Months
Exotherm (Measured on 100 mL sample, cylinder of diameter 49.4 mm @ 23 °C)	<60 °C
Shrinkage	< 1%
Cured System	
Color (Mixed System)	Amber
Thermal Conductivity (W/m.K)	0.25

Category	Results
Cured Density (g/mL)	1.10
Temperature Range (°C)	-50 to 100
Max Temperature Range (Short Term (°C)/2 hours) (Application and Geometry Dependent)	+110
Max Temperature Range (Short Term (°C)/30 Mins) (Application and Geometry Dependent)	+130
Volume Resistivity (ohm-cm)	10^{10}
Dielectric Strength (kV/mm)	~16
Shore Hardness (@ 25 °C)	A50
Flame Retardancy	Meets UL94 V-2
Dissipation Factor @ 50 Hz	0.02
Permittivity @ 50 Hz	4.90
Water Absorption (9.7 mm thick disk, 51 mm diameter) 10 days @ 20 °C / 1 hour 100 °C	< 0.5% / <1%
Glass Transition Temperature, Tg (°C)	-40
Tear Resistance N/mm	0.70
Elongation at Break	~100%
Thermal Expansion Coefficient	75 to 100 ppm

APPLICATION GUIDELINES – RESIN PACKS

Mixing Procedures

When in Resin pack form, the resin and hardener are mixed by removing the clip and moving the contents around inside the pack until thoroughly mixed. To remove the clip, remove both end caps, grip each end of the pack, and pull apart gently. By using the removed clip, take special care to push unmixed material from the corners of the pack. Mixing normally takes from three to four minutes depending on the skill of the operator and the size of the pack. Both the resin and hardener are evacuated prior to packing so the system is ready for use immediately after mixing. The corner may be cut from the pack so that it may be used as a simple dispenser. There is also a YouTube video (Polyurethane Mixing Instructions) available to show the mixing process.



APPLICATION GUIDELINES - BULK

Bulk Mixing

When mixing, care must be taken to avoid the introduction of excessive amounts of air. Automatic mixing equipment is available which will not only mix both the resin and hardener accurately in the correct ratio but do this without introducing air. Containers of Part A (Resin) and Part B (Hardener) should be kept sealed at all times when not in use to prevent the ingress of moisture. Bulk material must be thoroughly mixed before use. Incomplete mixing or use of the wrong mix ratio will result in erratic or partial curing.

ADDITIONAL INFORMATION

Cleaning: It is far easier for machines & containers to be cleaned before the resin has been allowed to cure. RRS is suitable for cleaning machines and containers and cured resin may be slowly softened and removed by soaking in our RRS.

Curing: Do not heat cure large volumes immediately. Allow these to gel at room temperature and post-cure at high temperature if required (refer to liquid properties for details). The material is not suitable for thick sections above 50mm as the exotherm build up during cure will create voids.

Storage: When storing under very cold conditions, the hardener may crystallise. If this occurs, simply warm (40 °C) the container gently until all crystals have re-melted.

SAFETY & WARNING

It is recommended that the company/operator read and review the Safety Data Sheets for the appropriate health and safety warnings before use. **Safety Data Sheets are available.**
