

ALPHA® TRUEHEIGHT® PREFORMS

Bondline Thickness and Tilt Control

DESCRIPTION

ALPHA TrueHeight Preforms are solder preforms designed to deliver consistent bondline thickness (BLT) and minimize die tilt resulting in predictable reliability and performance. Engineers can be confident of achieving their design goals during manufacturing. ALPHA TrueHeight Preforms are engineered with simplicity in mind to allow ease of implementation and maximum soldering performance. Engineered embedded spacer technology can address all major applications requiring 75µm bondline and above. In addition, ALPHA TrueHeight Preforms can be tailored in different sizes, shapes and thickness.

ALPHA TrueHeight Preforms have the advantage of flexible spacer positioning. Strategic locations can be chosen to ensure consistent bondline thickness. The architecture of the design not only addresses the BLT requirement but also reduces the opportunity for voiding. The design minimizes areas where gases can be trapped compared to other technologies, during the reflow process. **ALPHA TrueHeight Preforms** can be flux coated as well, from a wide selection of fluxes.

READ ENTIRE TECHNICAL DATA SHEET BEFORE USING THIS PRODUCT

FEATURES & BENEFITS

Features

- BLT control of 0.075mm and higher standard
- Prevents bondline tilt
- Various preform sizes, shapes and thicknesses available
- Preforms available in all standard solder and 4N purity alloys
- External flux coatings available for traditional and low voiding applications using non-tacky flux formulations
- Excellent electrical reliability performance to IPC J-STD-004B
- Variety of packaging configurations available to suit your assembly application

Benefits

- · Bondline thickness control and low die tilt
- Improved control of overall Package thickness
- Improved thermal reliability
- Flexibility to tailor the ALPHA TrueHeight Preforms design for specific applications

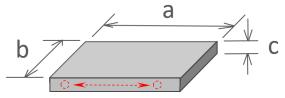

- Simplicity of design offers best-in-class overall performance
- Consistent BLT offers efficiencies during post processing operations including better X-ray inspection

PRODUCT INFORMATION

^{*} flexible bondline control at strategic location/s

| Legend | <u>Tolerance</u> | | |
|--------------------------|------------------|--|--|
| a = length (1.2 to 58mm) | ±0.05mm | | |
| b = width (1.0 to 58mm) | ±0.05mm | | |
| c = thickness | ±10% | | |

Bondline thickness available from 0.075mm

TECHNICAL DATA

| Standard | Alloy | Designation | Solidus / Liquidus, °C | | | |
|--------------------------------------------------------|------------------|--------------------------|-------------------------|--|--|--|
| J-STD-006B | Pb-free | SAC305 / 387 / 357 / 405 | 217 to 221 | | | |
| | High Reliability | Innolot / PowerBond | 206 to 218 / 225 to 255 | | | |
| | SnPb | Sn2Pb95.5Ag2.5 | 299 to 304 | | | |
| | SnSb | SnSb5 | 234 to 240 | | | |
| Proprietary | Low Silver | SACX Plus 0307 | 217 to 228 | | | |
| Also available in other or special alloys upon request | | | | | | |

ALPHA TrueHeight Preforms flux coated preforms are available in various coating levels, appropriate for specific application requirements. Special flux coating requirements can also be considered. Refer to ALPHA AccuFlux® and Alpha standard External Flux technical bulletins for more information.

| Flux Reliability Data (J-STD-004-B) | | | | | | | |
|-----------------------------------------|------------|----------|---------------------------------|--------|--|--|--|
| Test | Standard | Method | Conditions | Result | | | |
| SIR Surface Insulation Resistance | IPC-TM-650 | 2.6.3.3 | 85 °C / 85% RH - 7 days | PASS | | | |
| SIR Surface Insulation Resistance | IPC-TM-650 | 2.6.3.7 | 40 °C / 90% RH - 7 days | PASS | | | |
| ECM Electrical Chemical Migration | IPC-TM-650 | 2.6.14.1 | 65 °C & 85 °C / 85% RH – 500hrs | PASS | | | |
| Copper Corrosion | IPC-TM-650 | 9 days | 40 °C / 93% RH | PASS | | | |
| Copper Mirror | IPC-TM-650 | 2.6.3.7 | 25 °C / 50% RH – 24hrs | PASS | | | |

RECYCLING SERVICES

We provide safe and efficient recycling services to help companies meet their environmental and legislative requirements and at the same time, maximize the value of their waste streams.

Our service collects solder dross, solder scrap, and various forms of solder paste waste. Please contact your local sales representative for recycling capabilities in your area or link here.

SAFETY & WARNING

It is recommended that the company/operator read and review the Safety Data Sheets for the appropriate health and safety warnings before use. **Safety Data Sheets are available at MacdermidAlpha.com/assembly-solutions/knowledge-base.**

STORAGE

The parts are packaged in ESD safe reels. Storage in a nitrogen cabinet is recommended after opening. When properly stored a shelf life of 6 months from date of manufacture is guaranteed.
